

Course Name: Carpentry

Assignment One: Explain the process to build a wooden chair

Feedback Date: <<insert date>>

Student Name: <<insert name>>

Marking Criteria	MARKS	COMMENTS
Content	19/20	Great job on the sequencing of the instructions: from the preparation of materials to the assembly, it was clear how the job progressed. The step by step instructions could have benefitted from shorter sentences beginning with the "action". For example: <ul style="list-style-type: none">• Cut the wood to the required dimensions.• Apply the glue to the connecting parts.
Organisation	4/5	Good use of titles to organize the different stages of the building process. Effective introduction as you encouraged the preparing all the materials in advance. Next time, consider including a summary at the end to highlight the key steps.
TOTAL	23/25 A	This is a good preliminary work that will assist you in developing a complete set of instructions for the self-assembly project at the end of the course. Well done!
